

Helping Virginia Homes and Businesses Save Energy

Rebates for Homeowners

Virginia homeowners can lower energy use with rebates and no-cost energy-saving products.

Benefits include:

- Rebates for qualifying heating equipment, including high-efficiency furnaces, dual-fuel heat pumps and water heaters
- Savings on smart thermostats, energy-efficient windows and other energy-saving products
- Free energy conservation kits with easy-to-install products
- An Income Qualifying Energy Efficiency Program providing no-cost home energy repairs

Incentives for Businesses

Our financial incentives and technical expertise help Virginia businesses reduce energy use—and operating costs.

Benefits include:

- Incentives for qualifying boilers, heating equipment and water heating systems
- Incentives for smart thermostats and controls, steam system improvements, food service equipment and other qualifying building upgrades
- Support for custom projects that deliver measurable natural gas savings
