

WG Home Energy Savings Program: Maryland Furnace or Boiler Tune-Up

SAVE \$100 ON A FURNACE OR BOILER TUNE-UP WITH A WASHINGTON GAS REBATE

Just like your car needs regular maintenance, so does your furnace or boiler. A tune-up now can help you avoid costly repairs or a breakdown next winter. That's why Washington Gas offers \$100 furnace or boiler tune-up rebates to keep heating systems running more efficiently and lasting longer.

How a Furnace or Boiler Tune-Up Benefits You

Your home heating system works hard to keep you comfortable. Over time, it can get bogged down with dust and grime, and essential components can wear out. A tune-up by a trained technician will help make sure that when you turn the heat up, your home heating system is operating at peak efficiency.

BIG SAVINGS

Tune-ups extend the life of heating equipment and help prevent expensive breakdowns. They may also help reduce your monthly energy bill.

MORE EFFICIENT HOME HEATING SYSTEM

A well-maintained furnace produces and distributes warm air more evenly throughout your home.

What Happens When You Get a Furnace or Boiler Tune-Up?

A furnace or boiler tune-up is a simple way to help make sure your heating system is ready for winter. One of our specially trained technicians will come to your home and perform a thorough inspection, along with a number of tests and procedures to make sure your furnace equipment is in optimal working condition. They will:

- Ensure the system is operating safely.
- Evaluate efficiency.
- Clean and adjust critical components.
- Inspect ductwork at furnace for leaks and disconnections.
- Check the thermostat and safety controls.
- Perform a carbon monoxide test.

Two Things You Should Do Before Your Furnace or Boiler Tune-Up

- Make a list of any questions you have about your heating system. Have you noticed a change in how it operates? Does it keep you comfortable all throughout your home?
- Ensure the areas around your furnace or boiler are cleared out and easily accessible for your technician.

Get your \$100 rebate in just three steps:

1. Find a participating contractor at WGSmartSavings.com/Contractor.
2. Have your participating contractor complete your furnace or boiler tune-up.
3. Your participating contractor will submit a rebate application on your behalf.
