

# SMART THERMOSTAT, WISE CHOICE.

Nearly half of the annual energy bill for the average American household goes to heating and cooling. That's more than \$900 a year. **Save \$100 on an ENERGY STAR® certified smart thermostat now** and save energy all year.

Upgrading to an ENERGY STAR certified smart thermostat can help you save money, reduce energy use and enhance home comfort. Smart thermostats learn your heating and cooling preferences and automatically adjust your home's temperature based on your schedule and habits.

## BENEFITS OF ENERGY STAR CERTIFIED SMART THERMOSTATS.

- **Control.** A smart thermostat's advanced technology allows you to adjust your home temperature remotely anytime, anywhere, right from your tablet or smartphone.
- **Comfort.** If there's a sudden change in weather while you're away, you can adjust the temperature accordingly for instant comfort when you return home.\*
- **Tracking.** A smart thermostat helps you monitor your home energy use to save on utility bills.
- **Savings.** The \$100 rebate on your new smart thermostat is only the beginning. Enhanced temperature control can lead to year-round savings on both heating and cooling costs.
